

Fiberdeck®

CATALOG 2021

Reliable products, designed to last for many years to preserve the environment.
As our natural resources are limited, we must protect and recycle for future generations.
Our products are made from 95% recycled plastic waste.

Leaders in our market, we are constantly looking for new products and solutions to improve the durability of our products and simplify their installation. Fiberdeck is a young and dynamic team that shares the same values and encourages collaborative work.
The respect of all our employees is the key of our success.

A WOOD PLASTIC COMPOSITE WITH A GREAT PERFORMANCE

CO-EXTRUSION, PREMIUM TECHNOLOGY

Co-extrusion is the new technology that is revolutionizing the wood plastic composite market. The frequent problems of staining and discoloration of first generation mono-extruded boards led us to use the co extrusion technology. It consists of applying a very thin plastic film in fusion directly to the core. This waterproof film protects the wood from any moisture issues and stabilizes the material. Expansion is also reduced to a minimum. Our 100% co-extruded Fiberdeck® decking profiles offer a much higher quality than any other product on the market.

20 YEARS WARRANTY WITHOUT ANY DISCOLORATION

With nearly 10 years of experience with this new technology and several million square meters marketed to date in a wide variety of climates, we can guarantee our products for 20 years without any visible discoloration.

UNIQUE DECORS AND STRIKING COLORS

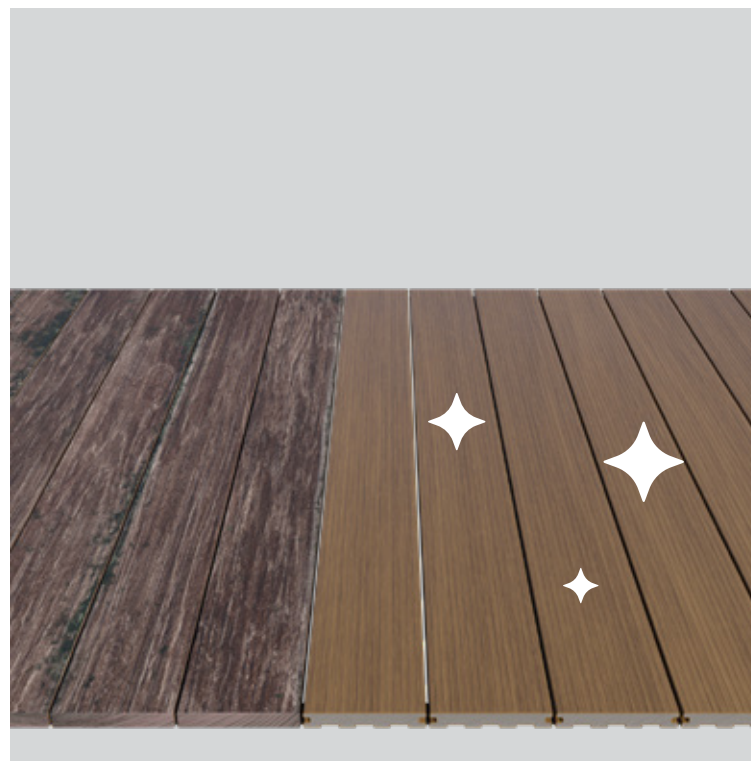

With nice patterns, colors and textures similar to exotic woods, our co-extruded boards provide a unique emotion to live for an exclusive experience. The technical and aesthetic qualities are a guarantee of serenity for the final user. With a matte appearance, the colors that dress the boards are intense and multi-chromatic. No two boards are identical, the manufacturing process allows for a variety of random shades. The decking projects created blend harmoniously into their environment. The result is unique, without equivalent on the market in terms of aesthetics and quality.

➤ fiberdeck.com

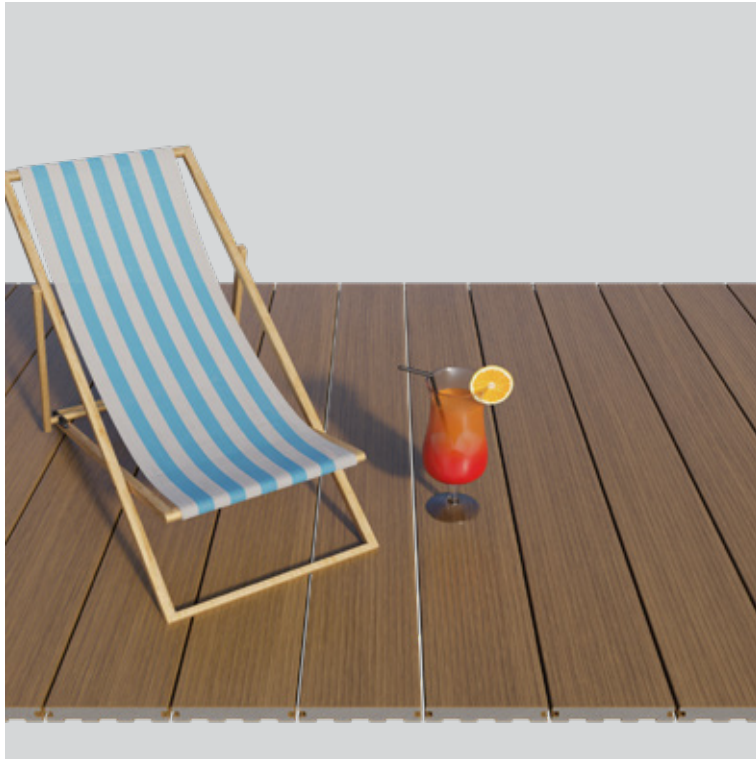

ADVANTAGES COMPARING TO OTHER COMPOSITE WOODS

- ✓ Made from 95% recycled materials
- ✓ Warranted for 20 years without fading
- ✓ Unique natural decors and textures
- ✓ Stain Resistant
- ✓ Very high dimensional stability
- ✓ Easy to install

A HIGH QUALITY & DURABLE WOOD PLASTIC COMPOSITE

Fiberdeck is committed to the durability of its products and warrants its decking, cladding and fencing range between 10 and 25 years (commercial, professional or public/residential use) against splintering and structural damage due to fungus, insects or termites, as well as the color and stain resistance of the products over the same period.

ULTRA LOW MAINTENANCE

A simple cleaning with a high pressure water jet (120 bars) is sufficient to clean your Fiberdeck deck. Thanks to the plastic protective coating, Fiberdeck decking will not turn gray or stain. The natural color, look and feel of the wood will persist in the most extreme climates and temperatures.

The aesthetics of the pattern are preserved over several decades while generating maintenance savings.

AND MADE WITH **95%** RECYCLED WASTE

Fiberdeck decking is made of 95% recycled wood waste and polymers. The wood, the main component with nearly 60% of the volume, comes from FSC-certified sawdust from secondary industries. The polymers come from recycled plastic bottles. We recycle 40 million plastic bottles in our products every year. Thousands of tons of plastic waste are thus recycled to produce a product with superior performance to natural wood.

A REVERSIBLE PROFILE WITH A CHOICE OF TWO DECORS

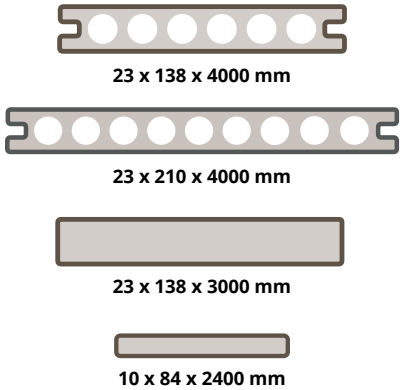

BROOKLYN boards offer a choice of smooth or textured wood grain in 4 multi-chromatic colors. The co-extrusion protection layer on both sides guarantees a very low expansion of the boards and a durable color over time. The finishing boards associated with this range can be adapted to all configurations.

Boards can be easily removed with Cobra® Hybrid hidden fasteners.

A BOARD WITH A SCULPTED CHARACTER

The new HERITAGE board has a unique design that perfectly imitates an exotic wood. The pores of the wood are reproduced down to the smallest detail. The surface of the board has irregularities that catch the light and give it rhythm. This is an «adze» look that corresponds to the ancestral tool used by carpenters to flatten a piece of wood. This board has a new co-extrusion hard cap that is highly resistant to chocs and abrasion. The protective layer is hard and limits scratches. This layer is present on all 4 sides of the board.

SMOOTH OR REEDED, **A STRIKING WOOD DECOR!**

MANHATTAN decking offers a choice of smooth or reeded faces in four multi-chromatic colors. The colors are warranted for 20 years and the decking requires very low maintenance. The grooves catch the light to give relief to the decking. The finishing boards, associated with this range, allow to realize all types of finishes such as swimming pools borders, stairs and skirting boards.

BOSTON WPC FENCING

THE BOSTON CONCEPT

Fiberdeck®

Modular elements and very easy to install.

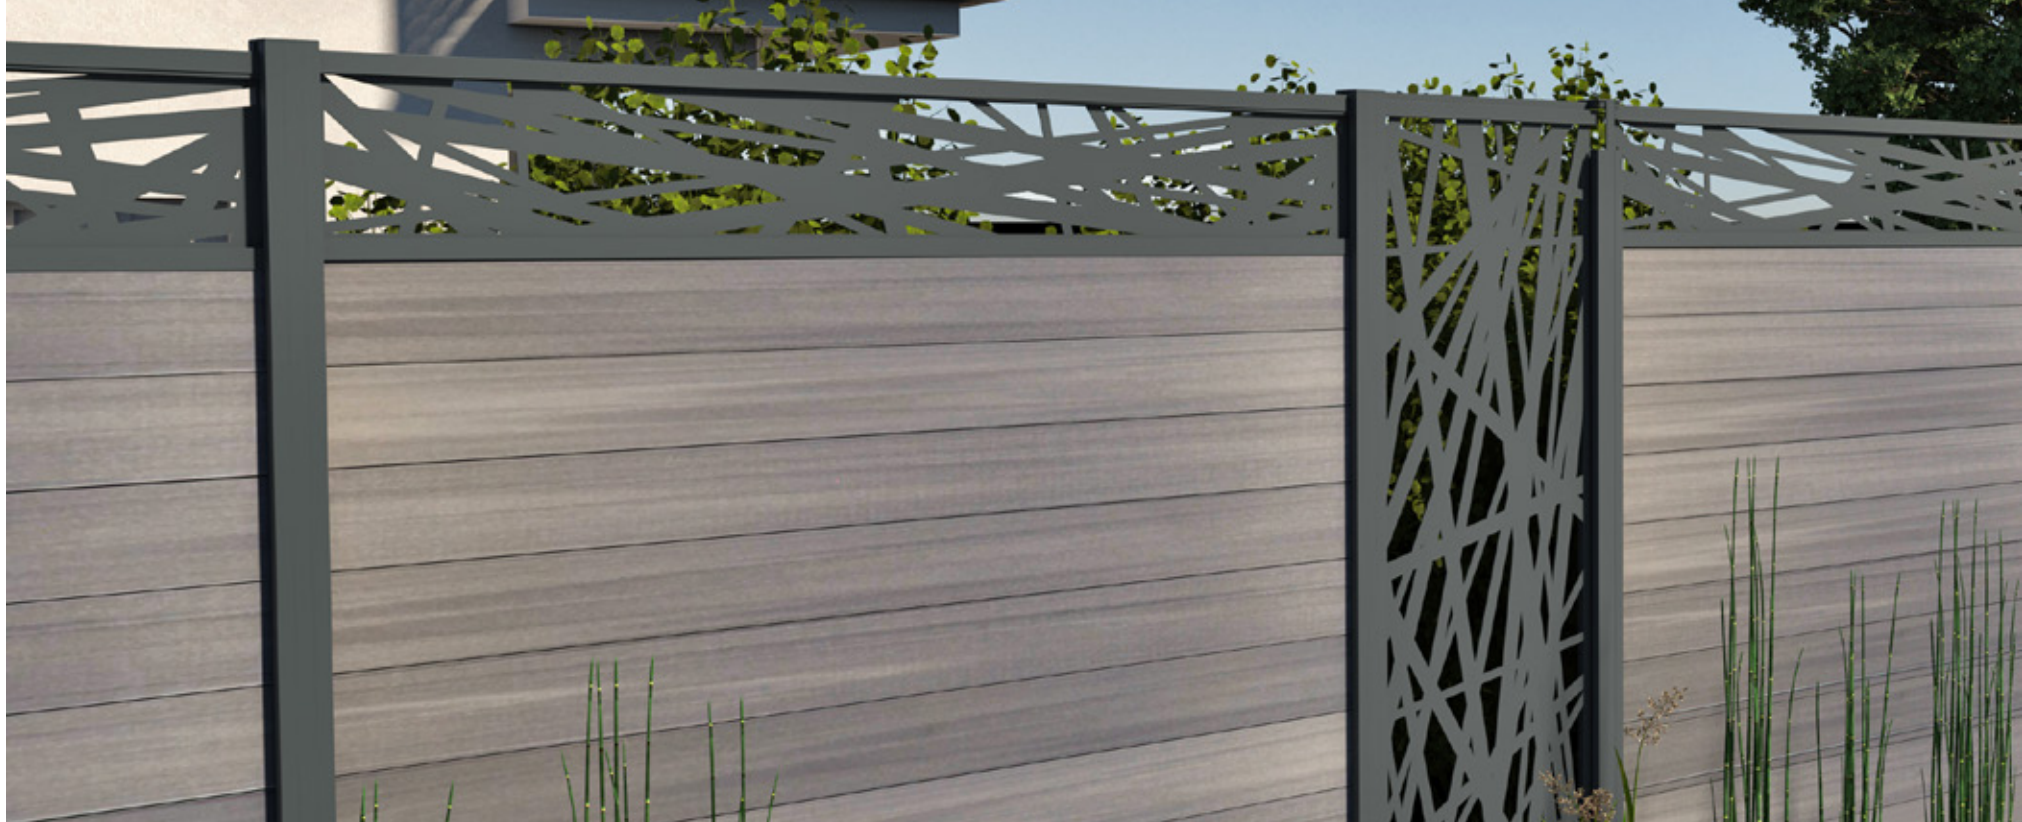

The posts are fixed either in the ground or on a concrete slab or low wall using anchors.

All designs are supplied with all the necessary fencing connectors.

No screws or nails!

The fence is very easily assembled thanks to connectors and stackable elements with a simple Allen Key.

THE BOARDS

ALUMINIUM

Qualicoat certified, the aluminium slats, as well as the posts and decorations, are powder coated (RAL7016). They therefore have excellent durability and good resistance to the elements. These slats can be combined harmoniously with the composite slats and decors to create structured patterns.

THE BOARDS

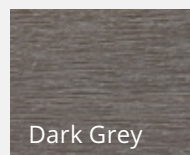

PREMIUM

The latest co-extrusion technology ensures that these composite wood boards are not only guaranteed against insect and termite attack, but are also resistant to the sun's UV rays and therefore guaranteed for 20 years against discolouration and staining.

A thin layer of polymer protects them all over their surface to ensure a perfect seal. Finally, to give the fence extra strength, the boards can be stiffened with galvanised steel reinforcements.

THE BOARDS

MODERN

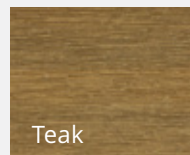

Using the same technology as PREMIUM range, these wood composite boards are also guaranteed not to fade in the most extreme conditions. They have a very modern look with a very contemporary faux-louvered appearance imitating thin wooden slats.

Available in a choice of 2 colors: Teak and Dark Grey.

These boards can also be stiffened with galvanised steel reinforcements.

FANTASY

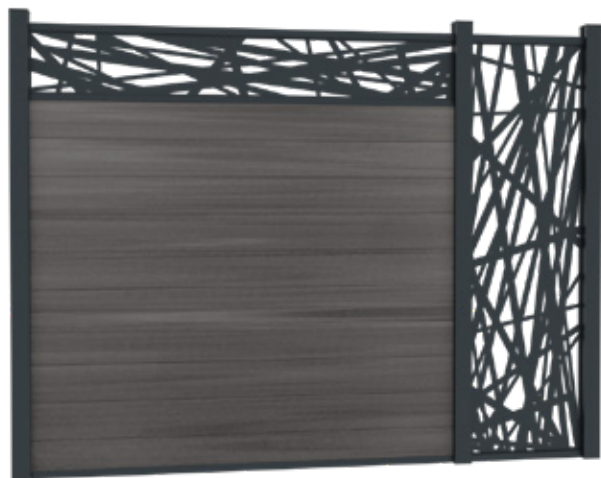

DECOR

PAXOS

Personalise your BOSTON fence with the PAXOS decors with their pure and very qualitative design. With a thickness of 2mm, powder-coated, the decors are delivered with their aluminium frame which is assembled on the aluminium or composite boards and in the posts.

2 models available: Horizontal and vertical.

The PAXOS Horizontal decor replaces exactly 3 composite boards .

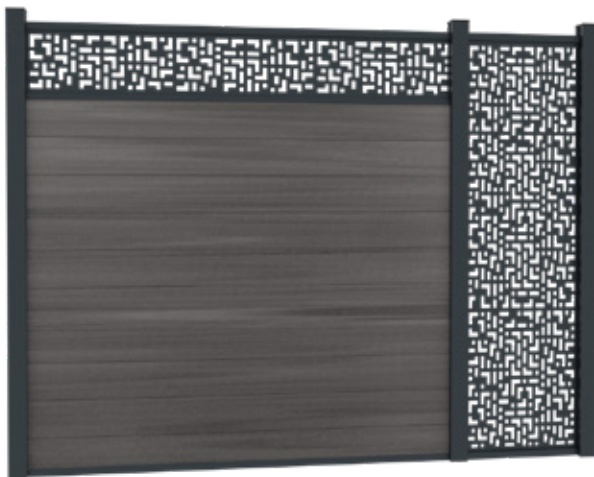

DECOR

HERA

Dare to be modern with the HERA décor. The zebra lines are resolutely contemporary and bring a unique style. The decors are offered with a grooved aluminium frame that fits perfectly on the aluminium or composite boards and in the rebates of the posts.

2 models available: Horizontal and vertical.

The HERA Horizontal decor replaces exactly 2 composite boards.

DECOR

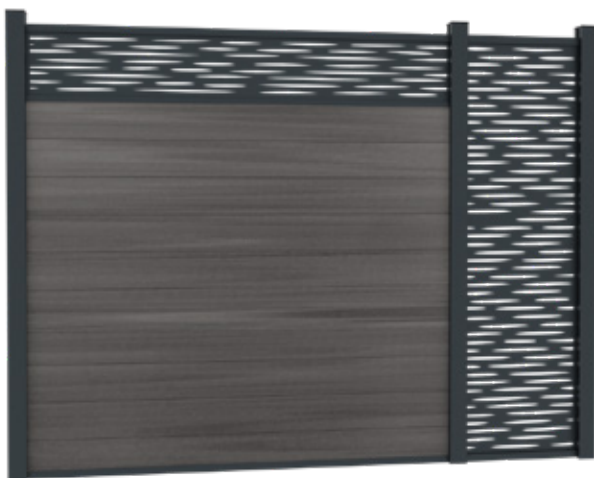

CRIOS

Are you a fan of geometric shapes? Choose the CRIOS decors, which can be used vertically or horizontally, between two boards or at the top of the panel.

The perimeter frame elements ensure perfect integration and finishing of the panel.

2 models available: Horizontal and vertical.

The CRIOS Horizontal decor replaces exactly 2 composite boards.

DECOR

LAMIA

The LAMIA decor adds a stylish, contemporary pattern to the panel while maintaining a dense filter for privacy.

The powder-coated aluminium construction ensures a long service life.

2 models available: Horizontal and vertical.

The LAMIA Horizontal decor replaces exactly 2 composite boards.

WEO[®] CO-EXTRUDED WOOD PLASTIC COMPOSITE CLADDING

WARRANTY AGAINST STAIN AND FADE

With 10 years of experience and several million square meters of installed projects to date in the most varied climates, we have been able to can warrant our products for 20 years without any visible discoloration.

UNIQUE PATTERNS AND STRIKING COLORS

Our co-extruded boards provide an exclusive experience. The physical and mechanical properties and aesthetics insure of serenity for the end user.

With a matt appearance, the colors of the boards are intense and multichromatic.

Each board is unique, the process of manufacturing allows to restore randomly varied shades.

Therefore, all installed projects blend harmoniously into their environment.

CO EXTRUSION : **A LEADING TECHNOLOGY**

Co-extrusion has been a revolution in the composite wood market. A patented waterproof film protects the wood from moisture absorption and stabilizes the material. Expansion is also reduced to a minimum. Our 100% WEO® cladding co-extruded profiles offer a outstanding quality.

CHOOSE A MODERN AND SUSTAINABLE ARCHITECTURE!

WEO® profiles are 95% made from waste plastic bottles and sawdust. The material is exceptionally weather resistant and is 100% recyclable.
